

WE'RE HIRING:

PHARMACEUTICAL DATA ANALYST

Role Summary

ASEPSA is seeking a highly skilled Pharmaceutical Data Analyst to join our Innovation hub within the US Hospital commercial team. This role is integral to our initiative of automating the identification of Pfizer products, particularly sterile injectables, in RFPs (Request for Proposals) using advanced AI technologies. The ideal candidate will bring deep expertise in sterile injectables and will be responsible for guiding the development of rules based and generative artificial intelligence models. Additionally, this person will perform rigorous validations and QA to ensure that the model outputs meet business stakeholders' expectations.

Basic Qualifications

- Bachelor's degree in Pharmacy, Pharmaceutical Sciences
- Minimum of 1 year of experience in the pharmaceutical industry, ideally with experience in technical drug data sheets.
- Intermediate English with strong written proficiency.
- Advanced knowledge of the sterile injectables.
- Strong analytical skills and experience with tools like Excel, or equivalent for data analysis.
- Capable of translating rules/logic into detailed business requirements.
- Nice to have, proven track record in conducting validations and QA for AI models.
